

Measuring and Fitting Instructions

How to Measure ;

Always use a wooden or metal rule as fabric tapes tend to stretch. Inside the window is the ideal position for a blind, but remember that the recess must be deep enough for the blind to operate correctly.

Inside Recess ;

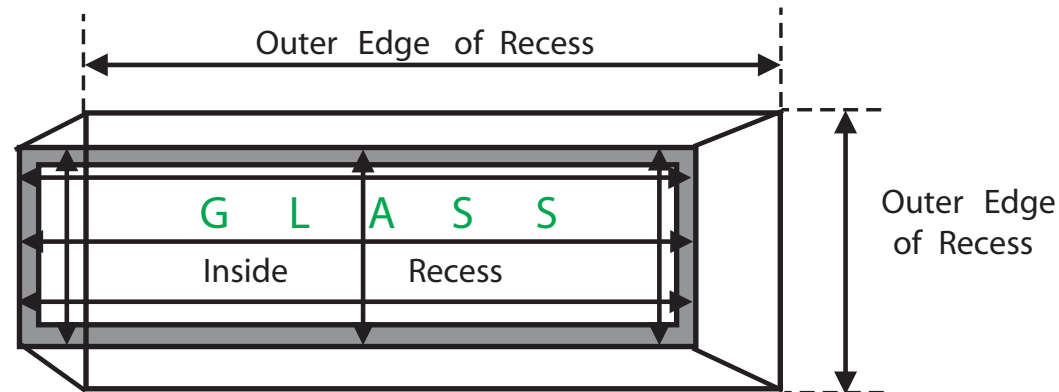

Carefully measure the full recess width and drop as indicated in the diagram.

It is advisable to measure the width and drop in three places to check for squareness. Only the smallest dimensions should be quoted when ordering.

Over the outside of the recess;

Decide how much you wish to overlap the outer edge of the recess at each side and at the top and bottom. We recommend the overlap should be about 3" each side to ensure that the window is covered and that no gap appears at the sides. Then measure accordingly. Your blind will then be made to this exact size.

N.B. On roller blinds this dimension for outside the recess will be taken as cloth size.

Fixing;

The standard type of bracket supplied will be top fix. i.e. to fix to the underside of the recess.

Should this not be possible special brackets are available as an option to either face fix (to a wall or window frame) or side fix (to the side of the reveal). Some products such as Roller blinds and Venetian blinds are supplied as standard with universal fixing brackets that will cover most fitting problems.

Please note that fabrics marked with ** are open weave or fine in nature. As such many of the wide flat braids in the Pulls Collection would only be suitable for use if they are applied to both sides of the blind. Please take care when calculating the cost in these instances.

Roller Blind Specification and Information

A white sidewinder mechanism with powder coated white metal brackets and a heavy duty 32mm fluted barrel is fitted as standard on the right hand side of all Colorway Roller Blinds.

The standard mechanism is also available in Brown, Black and Cream with matching brackets and chain.

Plastic bracket covers are also available at an additional cost. A standard spring roller is available in white only at no extra cost.

All prices are calculated on pin sizes and finished drops.

Blinds are supplied with a sewn & turned bottom pocket, universal brackets, screws and fitting instructions.

As all blinds are custom made, shaped bottoms may be finished differently from the illustrations to ensure the overall appearance of the blind is balanced.

On standard finish blinds the braid or tassel will be placed across the stitching line. A number of cord safety devices are now available to assist in the prevention of accidents. Please ask for details.

Optional Extra Charges

Re-Covers - Roller Blinds with customers own fittings Deduct 10% from normal price for complete blind

Roller blind repairs or alterations - Min charge £26.00

System 32 Cassette Headbox - Add £21.00 per metre

Mottura Decelerator Roller System - SLOW 1926

April 2010 R

Care: Min Pin size 24.75" (630mm)

Produced on a contract weight 32mm aluminium tube the Decelerator slows the ascent of the spring to produce a sophisticated operation of your Roller blind.

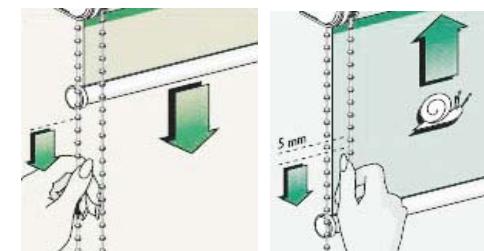

Mottura 32mm Decelerator Spring Mech & Brackets
Aluminium backplate (white) suitable for PLUS and SLOW

£62 Add to basic blind price
£16.75 per metre incl turnbuckle brackets

Mottura Plus! Roller System - PLUS 1929

Care: Min Pin size 26.75" (680mm)

Produced on a contract weight 32mm aluminium tube the PLUS system operates like a conventional sidewinder when lowering your blind. A gentle pull on the front chain causes the blind to automatically rise at a decelerated pace in the same manner as the spring system. When the chain is released the blind automatically stops.

Mottura 32mm PLUS! Mech & Brackets
 Right Hand Operation Only

£78 Add to basic blind price

A height adjuster is available for PLUS and SLOW to mechanically set the upper stop limit Add £21.00 per blind

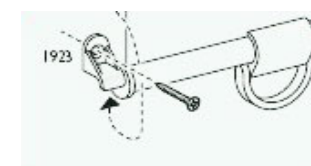

Mottura Skylight Roller Conversion

We now offer a single style of skylite blind combined with any fabric in our Roller collection. (avoid very bulky woven fabrics)

As standard the system has an aluminium fascia and aluminium side channels for additional light exclusion

Please note these systems are not supplied by Velux and may be different to blinds previously supplied. This does not affect the quality or fit of the product we now supply, nor does it affect its functionality compared to previous systems. Velux no longer supply blind kits to blind manufacturers

Roller Blinds Manufactured from Customers Own Soft Furnishing Fabric

(please refer to items marked N.B. at the bottom of the page before placing your order)

Colorway offer roller blinds made up in your customers own curtain fabric, giving you the choice of co-ordinating your blind with other soft furnishings in the room. This process DOES NOT USE STIFFENING SOLUTIONS which alter the character, appearance and sometimes the colour of your fabric. Our process uses a bonded laminate which is similar to a curtain lining material to give rigidity to the cloth without affecting the face in any way. This process also ensures there is no waffling, as is often the case with solutions.

Blinds over 48" may have a fabric join in the form of a central panel with balanced side joins (dependant on the width of your cloth)

THIS TYPE OF BLIND IS NOT SUITABLE FOR BATHROOMS OR VERY MOIST CONDITIONS

FABRICS TO USE: 100% Cotton or Polycotton give best results

FABRICS TO AVOID: Loosely woven and/or flame retardant fabrics. Piled, Silk and Acetate based fabrics. Fabrics which fray easily. Striped and Checked fabrics in particular (see below)

Fabric should be free from flaws and rolled on a cardboard tube to avoid crease marks which may be impossible to remove. Please check that the fabric design is square as it is not possible to cut or pull straight a pattern which runs off line. Striped and Checked fabrics are notorious for this fault.

To ensure sufficient fabric is sent to produce your blind please ADD 15" to the drop for a straight finish and 30" for a shaped finish. A pattern match will be required for joined blinds. At least 4" should be allowed on the width to square the fabric. Please indicate the top and also the correct face of the fabric if this is not clear.

N.B. Our blind makers have many years experience in handling your fabric, and whilst every effort is made to produce a perfect blind the pattern match on joined blinds and squareness of the blind to the pattern cannot be guaranteed as many fabrics are stretched during the printing or weaving process.

N.B. Orders are only accepted on the understanding that the customer (or retailer) has checked that the fabric is suitable for the intended purpose, and the pattern is either perfectly square or is sent on the basis that it has been deemed acceptable. We will not accept any claim for the cost of the fabric should a blinds prove unsuitable, unless through our own error.

N.B. OFFCUTS WILL NOT BE RETURNED UNLESS REQUESTED AT THE TIME OF ORDERING

Customers Own Fabric - Roller Blinds

April 2010 R

Blinds over 72" (1829mm) will be put on the 40mm contract system as standard

Standard Backing Choice of White or Cream. Please State when ordering

50mm & 35mm Extra

Mixed colours - Add 15%
Hold Down Brackets - £4.40 per pair
Side Guide Wires - Unavailable
Perforated slat - Add 30% ***

***WHEN ORDERING PERFORATED SLAT THIS MUST BE STATED CLEARLY AS ALL PERFORATED COLOURS ARE ALSO AVAILABLE AS SOLID COLOURS

Wooden Venetian Blind Information

WOODLUX Wooden venetians are hand crafted from North American Hardwood which is less susceptible to temperature and moisture changes. The slats are stained and lacquered to a fine finish.

Blinds are available in a range of colours from traditional woods to soft painted tones. Wooden venetians are a natural product and therefore variations in shade and grain as well as warpage may occur.

This product DOES NOT originate from the rain forests and is environmentally friendly.

The standard blind has a painted steel headrail with toning ladder strings and cords. The raise and tilt mechanism are cord controlled with wooden acorns.

A decorative valance is included which matches your chosen slat. A mitred return pelmet can be supplied for blinds fixed outside the recess.

25mm and 15mm Range

25mm & 15mm blinds are colour toned with a cord lift and clear tilt wand as standard. A top/face fix metal swivel bracket is supplied as standard.

25mm & 15mm Extra

Woodweaves (Pinoleum) Blinds Information

General

1. Prices are for either Roman or Rollup style. Please specify when ordering. Controls can be either side, but are supplied on the RH side as standard. Bottom edge is finished with a toning plain wood external bottom bar.
2. Rollup blinds are made overlong to provide a turn of material when the blind is in the fully down position.
3. Roof blinds are available only as Romans. They can be manufactured to most shapes POA
4. Edging tapes are not available on Dominica
5. Freehanging blinds - Max width 2000mm, Max drop 2450mm, Max Area 3sqm

Brackets

1. Top/Face fix brackets as standard

Pricing

1. Solid Brass toggles £6.80
2. Designer Toggles (Acorn, Pear, Teardrop or Classic) £3.50
3. Shaped and Skylight roof blinds (Roman only) POA
4. Flame Retardent to BS476 Class 1 £50.00/sqm
